

1. I want to start by testing the site. I want to see if I can locate any errors just by doing a little Scooby Dooing. If I find any bugs, I'll log them, how I found the bug, and what it is.
 - a. First bug I noticed was the "see all robots" button.
 - i. - error code:"ERR_BAD_REQUEST"
 - b. Second bug was that no matter if I won or lost, the output was always loss on the scoreboard.

Test Case

Test Case ID: TC001 **Test Case Name:** Site Bug Testing

Description: This test case verifies the site is working properly and that the features all work correctly.

Preconditions:

1. VsCode is open and all required programs are installed.
2. No new error codes than the ones the ones before.

Test Steps:

1. Npm start.
2. Check network error codes.
3. Click on the "See All Bots" button.
4. Verify that the user successfully displayed all bot cards.
5. Verify that the user can successfully draw randomized bot cards and pick two to duel.
Verify the results of the duel are correct.

Expected Results:

- The user should see all bot cards displayed.
- The user should be able to duel bots and either win or lose and display results.

Test Environment:

- Operating System: Windows 11
- Browser: Chrome Version 93.0.4577.63

2. After all the errors are logged, I'm going to start working on the first one that seems to be the easiest to fix and work from there

Bug Report

Bug ID: BUG001 **Bug Title:** Incorrect Score Display and “See All Bots” not functional.

Description: The score only displays losses and no wins no matter the outcome of the duel and the “See All Bots” is not functional.

Steps to Reproduce Bug 1:

1. Npm start.
2. Navigate to “See all Bots button.
3. Click on the button to show all bots.
4. Observe the displayed cards.
5. Navigate to the draw button.
6. Click on the button to display random bots, then choose 2.
7. Click the Duel button and check the results.
8. The scoreboard should display the results of the duel.

Actual Results: The “See All Bots” button was not functional and the scoreboard did not display the correct results of the duel.

Expected Results: The Button should display all bot cards and the scoreboard should display the correct results from the duel.

Severity: Medium **Priority:** High **Assigned To:** Scooby Doo

Bug Report

Bug ID: BUG001 **Bug Title:** Incorrect Score Display and “See All Bots” not functional.

Description: The score only displays losses and no wins no matter the outcome of the duel and the “See All Bots” is not functional.

Steps to Reproduce Bug 1:

9. Npm start.
10. Navigate to the draw button.
11. Click on the button to display random bots, then choose 2.
12. Click the Duel button and check the results.
13. The scoreboard should display the results of the duel.

Actual Results: The scoreboard did not display the correct results of the duel.

Expected Results: The scoreboard should display the correct results from the duel.

Severity: Medium **Priority:** High **Assigned To:** Scooby Doo

3. Fixing the bugs wasn't too challenging. I found a third but gave up on trying to correct it.(error code 404-favicon.ico)
